

# Emergency Department Simulator

## Setup

Type of ED: Custom  
Daily Attendance = 335 patients  
Number of doctors = 16 doctors  
Number of sdec\_doctors = 10 sdec\_doctors  
Number of rat\_doctors = 2 rat\_doctors  
Number of nt\_doctors = 2 nt\_doctors  
Resus cubicles = 5 cubicles  
SDEC cubicles = 10 cubicles  
Majors cubicles = 26 cubicles  
Minors cubicles = 25 cubicles  
Waiting room capacity = 40 seats  
Days to run simulation = 14.0 days

## Number of incoming patients / patients in the ED and distribution throughout the day

	Acuity 1	Acuity 2	Acuity 3	Acuity 4	Acuity 5
Percentage	0.88%	5.5%	24.65%	60.68%	8.29%
Daily number	3	18	83	203	28

### Main metrics regarding time spent in the department depending on acuity

	Acuity 1	Acuity 2	Acuity 3	Acuity 4	Acuity 5
Mean time $\pm$ std	429 $\pm$ 152	349 $\pm$ 156	270 $\pm$ 141	256 $\pm$ 163	223 $\pm$ 143
Longest time	674	751	813	860	721
Time to see doctor - mean $\pm$ std	26 $\pm$ 36	18 $\pm$ 23	33 $\pm$ 31	128 $\pm$ 105	142 $\pm$ 106
Mean number left / day	0	0	0	6	0

### Percentage of admitted and discharged patients as a function of the time spent in ED

**List of model input parameters:**
